Example Email:

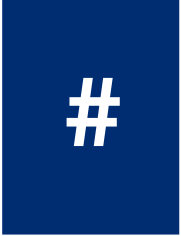

Hello,

The library hosts an institutional repository that provides open access to scholarly works by faculty and students at the university. The repository stores a variety of published and unpublished items produced by university affiliates. We believe that the research proposal and Research Day presentations would be an excellent fit for the institutional repository and wanted to gauge your interest (and students' interest) in making their work available through that platform.

Placing research-related student work in the institutional repository would preserve students' academic efforts, giving students a way to demonstrate their scholarly output as they move forward. We have found that many other university libraries are providing this opportunity to students, and we would like to do the same!

If you are interested in the institutional repository, we would be happy to go into more detail about storage and access. Please let us know if you have any questions!

Best,

Live Demonstration
